

**WITH A SECURE
WI-FI LINK BUILT
RIGHT INTO THE
CONTROLLER,
ANSWERS ARE
ALWAYS AT YOUR
FINGERTIPS
ON-SITE.**

If you've ever had to do troubleshooting on-site you may have found yourself with a lot of tough questions and with no easy way to get the answers you need. That's no longer a problem with **GALaxy IV**, which **features a secure built-in Wi-Fi link**.

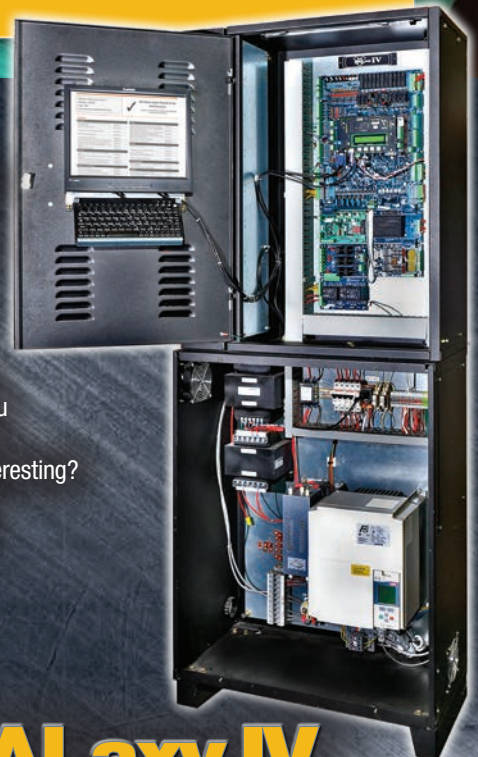

In addition to all the other advanced features you've come to expect from us, **GALaxy IV** is fully loaded with everything you could ever want to diagnose a problem on-site. And all this data is fully accessible via Wi-Fi with a smartphone or tablet—*no Internet connection required*.

This means instant access to system schematics, connection diagrams, MCPs (*created with the Helios Smart App*), manuals and fault logs. You can even play

back trace screens to identify input and output faults and perform a traffic analysis. Secure? The system is password protected and safe from remote access.

And being non-proprietary, **GALaxy IV** provides you with increased flexibility in maintenance. Which can save you plenty over the lifetime of a system.

GALaxy IV makes the entire job easier by providing Wi-Fi access to all the data you could ever need to troubleshoot a problem. Every detail is at your fingertips. Sound interesting? Then use your smartphone today and give us a call today. We'd love to tell you more.
