

When Global Guarding seems a bit much for the job, we have tailor-made, economical, Component-Based solutions ready to go

BETTER SOLUTIONS BY DESIGN

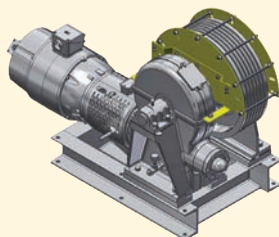

Hollister-Whitney Equipment Guarding Options

If you have the floor space and the right budget, then Global Guarding for the Machine Room is ideal. But **Component Guarding** can deliver big **benefits in economy, flexibility, efficiency and convenience** and easily meet Code requirements. Sometimes it even provides a safer way for mechanics to access tightly placed equipment. Hollister-Whitney Machine Guards require no welding, help reduce noise, offer easy to

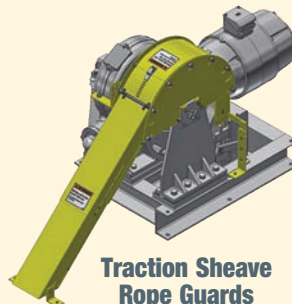

remove access panels, and our Governor Guards come fully assembled. We also offer Geared Machine Jump and Rope Guards, and Deflector Sheave Jump Guards too. Look, if Global Guarding doesn't fit your needs then call on the guys who built your equipment for solid Component Guarding options that will. We can provide a truly practical solution that does the job and meets your budget, in practically no time at all.
